

# NORTHSTAR OUTDOOR SAUNA NSO-57

Our roomiest NorthStar Outdoor Sauna, the 5'x7' sauna includes an L-shaped top bench, with seating for five or two people lying down. The NSO-57 includes a Viki 6 kW stainless steel heater with SaunaLogic2 control and mobile app.

## WHY NORDIC WHITE SPRUCE?

Traditionally, saunas are built of Scandinavian, or Nordic whitewoods. Worldwide, 90% of all saunas are constructed of this wood type. All Finnleo NorthStar saunas have tongue and groove Nordic White Spruce (NWS) on the walls and ceiling. Finnleo NWS is always European Grade A, harvested from the tops of trees more than 70 years old, with tight living knots. All portions of the sauna which the skin touches (benches, backrests, headrests, heater guard, and door handles) are made of Clear Aspen or Abachi.

Because our Nordic White Spruce is grown in Finland, north of 60° (near the Arctic Circle) it's an unusual softwood without the usual porous characteristics. The light-colored wood, with its natural stain resistance, gives it a more spacious feel with a modern Nordic look.

The Nordic Spruce/Aspen-Abachi combination used in Finnleo Saunas insures the saunas will smell fresher - as sweat doesn't impregnate the wood as it can with other woods. The sauna emits a subtle forest scent as it's heated.
